

NOTE: This router requires a 3/4" pocket or use of 8" X 8" black rubber gasket for router table installation. Pages 28, 31 & 32

If the rubber spacer gasket is used between the router and the original subbase, cut the subbase mounting holes in the rubber gasket to the approximate size of the dotted circle

Router Raizer Access Point

Drill .500" hole through router table insert plate
install #30 dust cover insert into .500" hole and press flush with top of insert plate

NOTE: This hole must be drilled 1/2" or .500" for #30 dust cover insert to fit properly.

Router Raizer Access Point

3/4" reference circle for drilling the routers original subbase only. Table mounted, drill 1/2" hole in table top.

1/2" = .500

.500" reference circle for drilling table top or insert plate.

Use this 6" scale to check accuracy when copied

Hitachi TR12

Note: Cross lines for locating and drilling holes are accurate. The illustration of subbase may vary slightly in size and design, but is accurate enough for cutting the rubber gasket if required.
